

AREA SOURCE EMISSION SUMMARY TABLES

SUMMARY TABLES

Baseline (2010) and Projected (2015) Summary Workbooks can be requested from UDAQ. Included in this workbook are the annual emissions that were input into the modeling process for the various area source categories. They do not include the effectiveness of any of the control strategies applied as a result of the SIP. These emissions are calculated within Excel Annual Episodic Workbooks that are also available upon request from UDAQ. An explanation of how the various area source categories were calculated is found section 3.c.iv.B of the TSD.
